Reviewer’s report

Title: A Unique Coexistence: Mirizzi Type IV and cholecystocolic fistula in one patient.

Version: 1 Date: 5 January 2007

Reviewer: Attila Csendes

Reviewer’s report:

Introduction

Complete, but English grammar should be improved considerably.

Case Presentation:

1. It would be important to state your normal values for SGOT, SGPT, etc, because there are variations in different laboratories.
2. Figure 3 is not very clear and should be eliminated.
3. References should be improved:
   a) Parenthesis numbers must be eliminated.
   b) Reference 2 is written incorrectly.
   c) In reference 3 November should be eliminated, etc.

Abstract

1. The correct word is enlarged.
2. Correct word is Hartman’s
3. Mirizzi type IV is only classified by Csendes and not by Mc Slerry.
4. Eliminate “proper surgical therapy” and leave only “surgical therapy”.
5. “That be came” should be “who came”.

What next?: Accept after minor essential revisions

Level of interest: An article of importance in its field

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.
