Reviewer's report

Title: Aneurysm of antecubital vein: an unusual complication of peripheral intravenous cannulation

Version: 2 Date: 4 April 2007

Reviewer: Hasan Ekim

Reviewer's report:

General

-------------------------------------------------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

1. Is there any relationship between venous aneurysm formation and normal coagulation profile? Is there any reference related to this issue?
2. What is the type of the aneurysm in your case? Real or pseudoaneurysm?
   In reference 1, presented case had pseudoaneurysm.
3. Were the histological examinations demonstrate endophlebosclerosis or endophlebohypertrophy or wall weakness?
-------------------------------------------------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

-------------------------------------------------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)

-------------------------------------------------------------------------------------------------------------------------

What next?: Unable to decide on acceptance or rejection until the authors have responded to the major compulsory revisions

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
