Reviewer's report

**Title:** Enhanced Susceptibility to Infections in a Diabetic Wound Healing Model

**Version:** 2  **Date:** 27 December 2007

**Reviewer:** warren garner

**Reviewer's report:**

**Major**
Many previous issues remain. The SPECIFIC role of Staph vs polymicrobial infection is unresolved. The reasons that Staph has an effect only in Diabetic wounds. The authors have still NOT discussed how their findings add to our understanding of diabetic- and infection-induced failure to heal.

**What next?:** Unable to decide on acceptance or rejection until the authors have responded to the major compulsory revisions

**Level of interest:** An article whose findings are important to those with closely related research interests

**Quality of written English:** Acceptable

**Statistical review:** No, the manuscript does not need to be seen by a statistician.
