Reviewer’s report

Title: A 6-month depot formulation of leuprolide acetate is safe and effective in daily clinical practice: a non-interventional prospective study in 1273 patients

Version: 1 Date: 26 April 2011

Reviewer: Danny Landau

Reviewer’s report:

Discretionary Revisions:
More mention of limitation of study. This study was based on biochemical data which is extrapolated to pertain to patient improvement. This is not necessarily the case. In addition, about 50% of patient had had previous androgen blockade, so the numbers may be more difficult to interpret.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
