Reviewer's report

Title: A case of squamous cell carcinoma arising from the suprapubic cystostomy tract

Version: 3 Date: 13 July 2011

Reviewer: subramanian vaidyanathan

Reviewer's report:

The authors should discuss why intermittent catheterisation was not implemented in this patient.

Under discussion, the authors may discuss why intermittent catheterisation is not carried out and why a patient is left on suprapubic catheter drainage for 55 years. The discussion can be more patient-oriented. What are the practical problems in implementing intermittent catheterisation regime?

Level of interest: An article of limited interest

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.
