Reviewer's report

Title: Choroidal Metastases in Testicular Choriocarcinoma, successful treatment with chemo- and radiotherapy: a case report.

Version: 1 Date: 3 October 2011

Reviewer: Stephen E Pautler

Reviewer's report:

This case report describes a rare presentation of metastatic testicular cancer. This is an interesting case and the authors describe only 18 cases documented in the literature with only 4 patients with durable survival. Overall the paper is well written but there is one grammatical mistake (Page 4: "Since two weeks..." should read, "In the previous two weeks...")

Overall looks good.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.
