Reviewer's report:

Major Compulsory Revisions
1. Please show the details of the chemotherapy regimen for the 3 relapse cases.
2. It is not unclear the meaning of table 4. It seems that it is not important for this manuscript. If the authors want to describe the tumor marker kinetics, it is better to add the range and SD of the abnormal value.

Minor Essential Revisions
1. Patients and Methods, third paragraph, "patients visit9 to...". Please double-check to "...".

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.
