Reviewer's report

Title: Neoadjuvant hormonal therapy is a feasible option in laparoscopic radical prostatectomy

Version: 4 Date: 31 October 2012

Reviewer: Gianmarco Isgró

Reviewer's report:

Paper seem s good to me now.
Would be very interesting to follow up patients at intermediate and high risk after NHT plus LRP and see in biochemical recurrence ad overalla survival is better that "only surgery" patients.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
