Reviewer's report

Title: Chronic expanding hematoma in the retroperitoneal space

Version: 1 Date: 19 April 2013

Reviewer: roberto molina

Reviewer's report:

The authors have to review the english grammar and the redaction of the paper. The abstract is not representative about the article. Is important to define the type of surgery, postoperative complications, etc. No theory about the cause of the haematoma is proposed. Conclusions are obtained about the literature review not from the case. References there are no actually references.

Level of interest: An article of limited interest

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
