Reviewer's report

Title: Severe hematuria after transurethral electrocoagulation in a patient with an arteriovesical fistula

Version: 2 Date: 28 October 2013

Reviewer: Marco Grande

Reviewer's report:

I noticed only discretionary revisions for this well described and interesting case report

- In my opinion, a more accurate definition of pseudoaneurysm would be needed.
- It would be stressed the concept of performing a CT angiography prior to transurethral electrocoagulation, when a pulsatile hemorrhage is revealed during cystoscopy, in order to report a suspected vascular malformation and to avoid the development of a vesical arterial pseudoaneurysm
- There are few bad-spelling to review

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
