Reviewer's report

**Title:** Addressing the contribution of previously described genetic and epidemiological risk factors associated with increased prostate cancer risk and aggressive disease within men from South Africa

**Version:** 2  **Date:** 22 October 2013

**Reviewer:** Rick Kittles

**Reviewer's report:**

The authors responded to most of the comments of the reviewers. However, information still is not provided on the subjects, their ethnicity, demographic, and clinical characteristics. This information needs to be provided in order to fully understand the genetic and clinical variation of the study population.

**Level of interest:** An article whose findings are important to those with closely related research interests

**Quality of written English:** Needs some language corrections before being published

**Statistical review:** No, the manuscript does not need to be seen by a statistician.

**Declaration of competing interests:**

I declare that I have no competing interests
