Reviewer's report

Title: Hem-O-Lok clip: a neglected cause of severe bladder neck contracture and consequent urinary incontinence after robot-assisted laparoscopic radical prostatectomy.

Version: 1 Date: 17 September 2013

Reviewer: Joshua Meeks

Reviewer's report:

This article describes migration of weck clip. This is very common and usually occurs with poor anastomosis. Did the patient have a anastomotic leap after surgery? The main conclusion is to avoid a urine leak during a surgery.

Level of interest: An article of insufficient interest to warrant publication in a scientific/medical journal

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
