Title: New Grading System for Upper Urinary Tract Dilation Using Magnetic Resonance Urography in Patients with Neurogenic Bladder

Version: 2 Date: 2 April 2014

Reviewer: Antonio A Cicione

Reviewer's report:

In this study Authors retrospectively assessed a new grading system for upper urinary tract dilatation. This grading was based on magnetic resonance exam (MR). Moreover, Authors correlated MR findings to previous ultrasound findings.

Just two comments:

Major Compulsory Revisions: Results should be separated from discussion

Discretionary Revisions: Have the authors considered to correlate assessed grading with the previous performed renal scan in order to evaluate if a linear correlation exists between grading and renal function.

Level of interest: An article of limited interest

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
