Reviewer's report

Title: Use of buccal mucosa grafts for urethral reconstruction in children: a retrospective cohort study

Version: 2 Date: 18 April 2014

Reviewer: Ming Wang

Reviewer's report:

Discretionary revisions

This is a well written retrospective review of 29 patients with complex urethral history who underwent buccal mucosal graft by 11 different surgeons between 1995-2012.

Few comments:

1) it would be interesting to have longer follow up, especially outcomes around and after puberty.

2) As these cases are rare and complicated, articles such these are helpful.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
