Reviewer's report

Title: Current evidence on robotic radical nephrectomy for renal cell carcinoma.

Version: 2  Date: 8 June 2014

Reviewer: francesco berardinelli

Reviewer's report:

I have reviewed the manuscript "Current evidence on robotic radical nephrectomy for renal cell carcinoma."

In this study, the authors performed a review of the current evidence on the role of robotic radical nephrectomy for the treatment of the RCC.

It is an interesting and well done review, even if it included only a few studies with a low level of evidence that does not allow to draw important conclusions.

I have only the following Minor Essential Revisions for the authors:

- Line 46: remove " in "robotic radical

Line 57: change “On” with “ON”

Line 128: If the sentence start with a number please write it in a word.

Tables

- Table 1 and 2: Please specify better in the table legends that “Perioperative outcomes” and “Oncologic outcomes” are for RRC for RCC. it should be specified here

Level of interest: An article of limited interest

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
