Reviewer’s report

Title: Bladder irrigation and urothelium disruption: a reminder apropos of a case of fatal fluid absorption.

Version: 3 Date: 7 July 2014

Reviewer: Takehisa Onishi

Reviewer’s report:

This is well written, and the case report provides an important information.

Will the same result happen if the patient without renal or heart failure is under the same situation?

Please discuss about the relationship between the patient’s conditions and the risk of bladder irrigation, as well as preventive measure.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
