Reviewer’s report

Title: 2-octyl cyanoacrylate versus reintervention for closure of urethrocutaneous fistulae after urethroplasty for hypospadias: a randomized controlled trial.

Version: 1 Date: 19 August 2014

Reviewer: Mirko Bertozzi

Reviewer’s report:

Major Compulsory Revisions: none

Minor Essential Revisions: none

Discretionary Revisions: The authors could discuss why they choose to close the UCF without fistula edges scarification as suggested by Prestipino et al. and if there was some difference for UCF repair related to the its diameter

Level of interest: An article of outstanding merit and interest in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
