Reviewer's report

Title: Effectiveness of preoperative pelvic floor muscle training for urinary incontinence after radical prostatectomy: a meta-analysis

Version: 2 Date: 18 October 2014

Reviewer: Mayank Agarwal

Reviewer's report:

meta-analysis of RCT's and quasiRCT's on efficacy of pre+post operative versus only postoperative PFMT on incontinence in patients undergoing RP. overall, the authors could not demonstrate any significant superiority of addition of preoperative PFMT. well analyzed meta-analysis revealing heterogeneity of inclusion criteria and lack of consensus on the subject.

no major issue. however, the manuscript must be thoroughly reviewed for English language and syntax errors.

Level of interest: An article of importance in its field

Quality of written English: Needs some language corrections before being published

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.
