Reviewer's report

Title: Expression of parathyroid hormone/parathyroid hormone-related peptide receptor 1 in normal and diseased bladder detrusor muscles: A clinico-pathological study

Version: 2 Date: 6 November 2014

Reviewer: Enrico Finazzi Agro

Reviewer's report:

This is an interesting study showing a possible new mechanism for bladder compliance impairment (parathyroid hormone related peptide and its receptor 1 (PTH1R)). The study is well conducted and the results are very clear. The Authors correctly state that the clinical implications of their findings are still far from being identified.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
