Reviewer’s report

Title: Neoadjuvant chemotherapy for primary adenocarcinomas of the urinary bladder: a single site experience

Version: 2 Date: 16 June 2014

Reviewer: amit mahipal

Reviewer’s report:

The report by Yu et al describe the outcomes of six patients with bladder adenocarcinoma treated with gem/cis/S-1 combination.

Few comments:

1) Kaplan-meir curves for 3 patients in each group does not provide any useful information. Please delete them.

2) Toxicity can be detailed in Results section.

3) On sentence 91 word "rejected" can be replaced by "refused".

4) If available, data for PFS can be added.

5) Sentences 114/115: Sentence "II degree of myelosuppression" needs to be changed. Do the authors mean grade 2 myelosuppression?

6) Gramatical errors on sentence 117/118, 147/148, 135 etc

7) Sentence 137/138: Making a conclusion that tumor stage does not make a difference based on 3 patients is not correct.

Level of interest: An article of limited interest

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.
