Version: 4 Date: 26 Jul 2002

Reviewer: Prof Jenny Southgate

Level of interest: A paper whose findings are important to those with closely related research interests

Advice on publication: Accept after discretionary revisions

The revised manuscript is much improved by concentrating on the spinal cord injury patient group.

Final sentence of abstract:
1) specify static organ cultures of urothelial tissue
2) prefer to substitute "such as mechanical stimulation" with "such as loss of voiding function" or similar.

Table 1 - please include brief explanation of terms used in "Level of SCI"
