Reviewer's report

Title: Exogenous Glycosaminoglycans Coat Damaged Bladder Surfaces in Experimentally Damaged Mouse Bladder

Version: 2 Date: 7 March 2005

Reviewer: simon lewis

Reviewer's report:

General
Changes made have helped the reviewer. Only one minor comment.

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

One page 5 line 17 from the top "layer may normally function to exclude salts." This statement is not compatible with statements that preceded it. Do the authors mean "... exclude macromolecules."?

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

What next?: Accept after minor essential revisions

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No
