Reviewer’s report

Title: APF, HB-EGF, and EGF Biomarkers in Patients with Ulcerative vs. Non-ulcerative Interstitial Cystitis

Version: 2 Date: 30 March 2005

Reviewer: Jørgen Nordling

Reviewer’s report:

General

-------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)
None

-------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)
None

-------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)
the first 5 lines in results is a repetition and should be avoided.
page 13, line 6: significant should be statistically significant.
Table 1: It is the only table and should consequently not be numbered. How is bladder capacity measured? Awake or during bladder distension?

What next?: Accept after discretionary revisions

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No
