Reviewer's report

Title: The hypoactive corpora cavernosa with degenerative erectile dysfunction: a new syndrome

Version: 2 Date: 11 March 2006

Reviewer: Suks Minhas

Reviewer's report:

General

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)
1. I would like a table of the investigations performed in excluding organic ED in these patients.
2. There needs to be a definition of what was taken as normal values for NPT and Doppler Studies. These values should also be tabulated.
Overall the paper is improved

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

Discretionary Revisions (which the author can choose to ignore)

What next?: Unable to decide on acceptance or rejection until the authors have responded to the major compulsory revisions

Level of interest: An article of importance in its field

Quality of written English: Needs some language corrections before being published

Statistical review: Yes
