Reviewer's report

Title: Study of the factors that affect the regrowth of calcium oxalate dihydrate fragmented calculi

Version: 2 Date: 16 May 2006

Reviewer: David S Goldfarb

Reviewer's report:

My review has been satisfactorily answered and the manuscript is improved. Some editing of the English would be useful, with revision of (for example) "significate", "majoritary", "uniformize", the meaning of which is clear although these formations are not correct. Perhaps the editors of BMC Urology could be helpful.

What next?: Accept after minor essential revisions

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Needs some language corrections before being published

Statistical review: No
