Reviewer’s report

Title: Ectopic thyroid in an adrenal mass: A case report

Version: Date: 1 29 May 2006

Reviewer: Evangelos Liatsikos

Reviewer's report:

Major Compulsory Revisions

The authors present their experience with the fourth case of ectopic thyroid in the adrenal gland. The references are not cited correctly. References 1 and 2 are cited after 3-5. The authors should rearrange the reference list.

The English language should be revised by a native English speaking person. The possible explanation of the pathophysiology mechanism of the thyroid descent is somewhat confusing and needs to be rephrased and clarified.

What next?: Unable to decide on acceptance or rejection until the authors have responded to the major compulsory revisions

Level of interest: An article of limited interest

Quality of written English: Needs some language corrections before being published

Statistical review: No
