Reviewer's report

Title: Plasma MMP2 in combination with MMP9 and TIMP1 improves the non-invasive detection of transitional cell carcinoma of the bladder

Version: 5 Date: 12 May 2006
Reviewer: Andrew Roddam

Reviewer's report:

General

The authors have adequately addressed all of the points that I raised in my previous review.

------------------------------------------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

------------------------------------------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

------------------------------------------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)

------------------------------------------------------------------------------------------------------------------

What next?: Accept without revision

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No
