Reviewer’s report

Title: Primary PEComa of the Bladder Treated with Primary Excision and Adjuvant Interferon-Alpha Immunotherapy: A Case Report

Version: 2 Date: 10 July 2006

Reviewer: Conrad Fernandez

Reviewer’s report:

General
None

---------------------------------------------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

---------------------------------------------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

---------------------------------------------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)

---------------------------------------------------------------------------------------------------------------------

What next?: Accept without revision

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No
