Reviewer’s report

Title: Long term effects of micro-surgical testicular sperm extraction on androgen status in patients with non obstructive azoospermia

Version: 4 Date: 10 August 2005

Reviewer: Akira Tsujimura

Reviewer’s report:

General

The authors changed some sentences, omitted some data and replied to my questions precisely. I think that revised version can be accepted for publication.

-------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

-------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

-------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)

-------------------------------------------------------------------

What next?: Accept without revision

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No
