Reviewer's report

Title: Percutaneous Needle Biopsy for indeterminate renal masses: A national survey of UK consultant urologists

Version: 1 Date: 8 May 2007

Reviewer: THOMAS JARRETT

Reviewer's report:

General

---------------------------------------------------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

---------------------------------------------------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

comment on what changes would be necessary in the field of pathology for biopsy to become a firstline diagnostic tool for renal masses

---------------------------------------------------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)

What next?: Accept after minor essential revisions

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: Yes, and I have assessed the statistics in my report.
