Reviewer's report

Title: On the pathogenesis of penile venous leakage: role of the tunica albuginea

Version: 3 Date: 3 May 2007

Reviewer: Richard A Santucci

Reviewer’s report:

General
I congratulate you on cleaning up the language and "flow" of the paper. It is much improved.

-----------------------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

-----------------------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)
1. Introduce the term "TA" in the background before using it "tunica albuginea (TA)".
2. Program used to do statistics should be listed in methods.

-----------------------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)

What next?: Accept after minor essential revisions

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
