Reviewer's report

Title: Bladder inflammatory transcriptome in response to tachykinins: Neurokinin 1 receptor-dependent genes and transcription regulatory elements.

Version: 2 Date: 2 May 2007
Reviewer: Anthony Atala

Reviewer's report:

General
The authors have addressed all the reviewers' comments. The revised manuscript is more concise, and the clinical relevance and potential physiological significance of the findings are clearer and the testable hypotheses are somewhat meaningful.

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

Discretionary Revisions (which the author can choose to ignore)

What next?: Accept without revision

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.
