Reviewer's report

Title: Prenatal diagnosis of a rare form of congenital mid-ureteral stricture: a case report and literature revisited

Version: 2 Date: 3 April 2007

Reviewer: George Kaplan

Reviewer's report:

General
In my opinion the article is now acceptable without further revision. However, if the authors have someone whose native language is English (either American or British) editing would further improve the manuscript.

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

Discretionary Revisions (which the author can choose to ignore)
