Reviewer's report

Title: HIV-Associated Bladder Cancer: A Case Series Evaluating Difficulties in Diagnosis and Management

Version: 1 Date: 19 June 2009

Reviewer: Kogenta Nakamura

Reviewer's report:

1. I have some comments.
2. When we always try to evaluate the patients with Grosshematuira or microscopic hematuira, we should rule out bladder cancer. This is not especially HIV patients.
3. You wrote CD4 value, but "How are CD8 value? or CD4/CD8 ratio?" I think that it is necessary to write CD4/CD8 for immunodeficiency patients.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
