Reviewer's report:

RE: Risk of prostate cancer after isolated high-grade prostatic intraepithelial neoplasia (HGPIN) detected on extended core needle biopsy: a UK hospital experience.

The paper is well written and the findings are interesting. The conclusions are well balanced and adequately supported by the data. The limitations of the work are clearly stated.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
