Reviewer's report

Title: What determines patient preferences for treating basal cell carcinoma? A discrete choice experiment survey from the SINS trial (surgery vs imiquimod)

Version: 2 Date: 14 September 2012

Reviewer: Esther de Vries

Reviewer's report:

I am satisfied with the answers to the reviewers questions.

Just one minor remark: there is a typo in at least the reference to the Kruijshaar paper in the introduction (mistakenly referred to as Kruijshar). It might be worthwhile to check the spelling of all literature references and the reference list.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
