Reviewer's report

Title: Trends in lipid profiles in patients with psoriasis: a population-based analysis

Version: 1 Date: 4 April 2012

Reviewer: Aldona Pietrzak

Reviewer's report:

1. authors should separately analyze lipid profiles in males and females, normolipidemic and hyperlipidemic subjects.
2. the group of subjects receiving lipid lowering therapy or statins should be analyzed separately
3. we couldn't find any figures in our version of manuscript
4. the results sections should be further reevaluated and written in more syncretic form
5. metaanalysis is indicated as well as the detailed discussion with the cited publications
6. there is lack of BMI, waist to hip ratio, blood pressure, amount of number of cigarettes and alcohol intake, and the comparison between those groups
7. authors should separately analyze lipid profiles in males and females, normolipidemic and hyperlipidemic subjects.
8. the group of subjects receiving lipid lowering therapy or statins should be analyzed separately

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.
