Reviewer’s report

Title: Skin cancers among Albinos at a University teaching hospital in Northwestern Tanzania: A retrospective review of 64 cases

Version: 1 Date: 25 April 2012

Reviewer: Myungshin Kim

Reviewer’s report:

This article described the clinical characteristics of skin cancers among Albinos in Northwestern Tanzania and their outcomes.

I think this report include valuable data including natural outcome of skin cancer in Albino patients.

minor comment

1. It is helpful to add the diagnostic criteria of Albinism in your institute.
2. If you have data of total Albino patient, you can add the incidence of skin cancer among Albino.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.
