Reviewer’s report

Title: Survey and online discussion groups to develop a patient-rated outcome measure on acceptability of treatment response in vitiligo

Version: 2 Date: 20 March 2014

Reviewer: Feroze Kaliyadan

Reviewer’s report:

Discretionary Revisions
Could clarify in a bit more detail regarding the sample size calculation and how exactly the primary survey was designed
Also a bit curious if the quality of life could have been incorporated in a more significant way into the survey. Maybe you could elaborate a bit more on this in the discussion session.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: Yes, and I have assessed the statistics in my report.
