Reviewer’s report

Title: Tomotherapy concomitant with Cetuximab, followed by Cetuximab as single-agent therapy for unresectable squamous cell carcinoma of the skin. A case report.

Version: 2
Date: 18 July 2014
Reviewer: Gaelle Quereux

Reviewer’s report:

It is an interesting case report describing the efficacy of an emerging association: cetuximab + tomotherapy
The discussion is clear and relevant.
The writing is acceptable and suitable for a scientific peer-reviewed journal.

Recommendation: text acceptable for publication with minor revisions:
- Case presentation might be more concise (especially in the description of the choice of the treatment)

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: Yes, and I have assessed the statistics in my report.

Declaration of competing interests:
