Reviewer's report

Title: Relationship between working with Video Display Terminals (VDT) and frequency of dermatologic manifestations in office workers: a cross-sectional study

Version: 11 Date: 9 February 2005

Reviewer: Berndt Stenberg

Reviewer's report:

General

The corrections are OK.

-------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

The reference list needs corrections. As far as I can see almost all references are wrongly stated. For example, reference 2 and 10 probably are the same. In many instances the first “name of the authors are given instead of their family name.

-------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

Check for mis-spellings.

-------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)

What next?: Unable to decide on acceptance or rejection until the authors have responded to the major compulsory revisions

Level of interest: An article of limited interest

Quality of written English: Needs some language corrections before being published

Statistical review: No
