Reviewer's report

Title: Anti-thyroid peroxidase antibody and vitiligo: a controlled study

Version: 2 Date: 20 December 2005

Reviewer: Mauro Picardo

Reviewer's report:

General
I revised the new version of the manuscript "Anti-thyroid peroxidase antibody and vitiligo: a controlled study".
The authors improved the quality of the manuscript, as suggested by the referees. The work did not add any progress to the understanding of the vitiligo pathogenesis but it provides an interesting evaluation of the antibodies pattern in a geographic area poor studied. The manuscript can be accepted.

-------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

-------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

-------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)
