Reviewer's report

**Title:** Assessment of a new questionnaire for self-reported sun sensitivity in an occupational skin cancer screening program

**Version:** 2  **Date:** 7 July 2008

**Reviewer:** Richard Bräsnström

**Reviewer’s report:**

I am happy with the changes and additions made. Clearly the authors and I have different opinions regarding the value of the new scale for measuring sun sensitivity. However, we do agree on the necessity to develop more accurate measures. I recommend that the paper might be published in its current form, even though the general interest is somewhat limited.

**Level of interest:** An article whose findings are important to those with closely related research interests

**Quality of written English:** Acceptable

**Statistical review:** No, the manuscript does not need to be seen by a statistician.

**Declaration of competing interests:**

I declare that I have no competing interests
