Title: Pleomorphic adenoma of the nasopharynx: a rare case with therapeutic misadventure

Version: 1 Date: 24 September 2009

Reviewer: Ann D kING

Reviewer's report:

Major compulsory revisions

Unfortunately I am not sure that this is a nasopharyngeal pleomorphic adenoma. The CT images are taken at the level of the oropharynx and appear to show that the tumour is located in the parapharyngeal region, which is a common site for minor salivary gland tumours. An image at the level of the nasopharynx would need to be included and this image would need to show that the tumour is in the nasopharyngeal cavity and not arising from the adjacent parapharyngeal space.

Level of interest: An article of limited interest

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
