Reviewer's report

Title: Radiological Findings In Patients Undergoing Revision Endoscopic Sinus Surgery: A retrospective case series study

Version: 1 Date: 10 September 2010

Reviewer: Rong-San Jiang

Reviewer's report:

Major Compulsory Revisions
Methods:
The definition of significant septal deviation and middle turbinate lateralisation were not given.

Results:
The symptoms and endoscopic findings of these revision FESS patients should be added.
Table 1: The incidence of anatomical abnormalities should be reported on the sides of revision FESS instead of the number of patients.
Table 2: The mucosal status of the paranasal sinuses should be reported on all sides of revision FESS instead of the worse side.

Minor Essential Revisions
Methods
The scoring definition of the Lund-Mackay staging system should be clearly mentioned in the text.

Level of interest: An article of limited interest

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.
