Reviewer's report

Title: Vestibular evoked myogenic potentials in 5 patients with superficial siderosis

Version: 4 Date: 3 February 2013

Reviewer: Rafael Llinas

Reviewer's report:

The paper is well written and interesting. The electrophysiology is well performed. The issue is important even if the problem is an uncommon one. In addition, a clear description of the exact cause of hearing loss in SS has not been previously well described.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
