Version: 5 Date: 8 Jul 2002

Reviewer: Prof Ken Kleinman

Level of interest: A paper whose findings are important to those with closely related research interests

Advice on publication: Accept without revision

The responses are adequate. I appreciate the author's clarification of the aspects of the analysis I had not understood.

I'm still unsure of what the authors mean when they say that the season are 'conventionally defined.' I did explain that this means different things in different countries, and it would be a simple modification to explain exactly what it means in this case
