Title: Epidemiologic profile of head and neck disorders in a tertiary hospital unit in Greece: a challenge for general practitioners?

Version: 1 Date: 24 April 2006

Reviewer: William S McKerrow

Reviewer’s report:

General

-----------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

-----------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

-----------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)

I initially found some of the data presentation a little confusing, particularly table 3 and reference in the caption to the fact that it should be read along with table 2 would be helpful.

What next?: Accept after discretionary revisions

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No
