Reviewer's report

Title: Hamartomas, teratomas and teratocarcinosarcomas of the head and neck: Report of 3 new cases with clinico-pathologic correlation, cytogenetic analysis, and review of the literature

Version: 1 Date: 23 June 2008

Reviewer: Mario Luna

Reviewer's report:

An excellent paper. Unfortunately the illustration (fig 2) is not representative of teratocarcinosarcoma. I suggest that you illustrate the different sarcomatous components and very important the neuroectodermal component.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
