Regarding MS6320459942714408

I now would like to accept the above article with minor essential revision. These are:

Page 5 line 4 You should indicate whether the PAS tool is validated or not

In the limitations of the study I would suggest adding a sentence along the following lines “It should be noted however, that some of the tools that were used in the study were not validated and some of the measures were based on patient recollection, such as weight as reported by the patients”.
